## **SAN ANTONIO'S NEWEST SOLAR FARM NOW PRODUCING POWER FOR SAN ANTONIO**

**CON EDISON DEVELOPMENT,  
A NATIONALLY PROMINENT RENEWABLE ENERGY DEVELOPER,  
ASSUMES RESPONSIBILITY FOR ALAMO 3**

**SAN ANTONIO – February 19, 2015:** Alamo 3, the latest solar facility developed as part of a 400-MW solar project between CPS Energy and OCI Solar Energy, is now in commercial operation. The new photovoltaic solar installation provides 5.5-megawatts of renewable power to CPS Energy customers in the San Antonio area, enough to power approximately 1,300 homes for a year.

Consolidated Edison Development, a New York State-based developer and operator of large-scale renewable energy projects, assumed responsibility for the 5.5-megawatt farm earlier this month.

CPS Energy, through power purchase agreements with operators like ConEdison Development, has 134 megawatts of solar generation capacity – the most in Texas.

“The launch of Alamo 3 represents another milestone in renewable energy development for our customers. It also supports technologies that protect our environment and boost local economic development,” said CPS Energy Executive Vice President Cris Eugster. “We look forward to a long partnership with ConEdison Development, which has a reputation as one of the country’s most successful and reliable renewable developers.”

“Through its growing commitment to renewable energy, CPS Energy is emerging as a role model for municipally owned utilities nationwide,” said Mark Noyes, senior vice president and chief operating officer of ConEdison Development. “As our company steadily expands our national renewable portfolio, it is a privilege to help deliver clean and environmentally benign power supplies to the people of Greater San Antonio.”

The solar facility will deliver electricity to CPS Energy under a 25-year power purchase agreement.

### **About CPS Energy**

CPS Energy is the nation’s largest municipally owned natural gas and electric company, providing service to 756,000 electric and 334,000 natural gas customers in the Greater San Antonio area. The company offers the lowest rates among the top 10 largest U.S. cities and second lowest among the top 20, while ranking number one in wind-energy capacity among municipally owned energy systems and number one in Texas for solar generation.

## **About Consolidated Edison Development**

ConEdison Development (“CED”) develops, owns and operates renewable and energy infrastructure projects. The company is one of the largest owners and operators of solar projects in North America. CED is focusing on renewable energy and gas assets as part of an overall corporate goal of responsible environmental stewardship. Through its deep resources and trusted relationships with a range of energy-related companies, CED has successfully developed, and owns and operates facilities generating in excess of 550 MW of renewable power across California, Arizona, Nevada, Texas, Nebraska, New Jersey, Massachusetts, Pennsylvania, South Dakota and Rhode Island.

Consolidated Edison Development ([www.coneddev.com](http://www.coneddev.com)) is an unregulated subsidiary of Consolidated Edison, Inc. [NYSE: ED], the nation's oldest and one of the largest investor-owned energy companies, with approximately \$12 billion in annual revenues and \$42 billion in assets. More information can be obtained by calling 914-993-2185. You can also visit the Consolidated Edison, Inc. website at [www.conedison.com](http://www.conedison.com).
